SUGGESTED SYSTEMS (Under Drawings)

Model	Description
G5PS	System includes one 91 cm, 38-watt Dehumidifier and one Humidifier reservoir.
G6PS	System includes one 91 cm, 38-watt primary Dehumidifier, one 61 cm, 25-watt Dehumidifier, and one Humidifier reservoir.
G7PS	System includes one 91 cm, 38-watt primary Dehumidifier, one 61 cm, 25-watt Dehumidifier, and two Humidifier reservoirs coupled with a large diameter tube.

SUGGESTIONS DE SYSTÈMES (sous les dessins)

Modèle	Description
G5PS	Ce Système inclut 1 Déshumidificateur 91 cm - 38 watt et 1 bac Humidificateur.
G6PS	Ce Système inclut 1 Déshumidificateur 91 cm - 38 watt primaire, 1 Déshumidificateur 61 cm - 25-watt et 1 bac Humidificateur.
G7PS	Ce Système inclut 1 Déshumidificateur 91 cm - 38 watt primaire, 1 Déshumidificateur 61 cm - 25-watt et deux bacs Humidificateurs couplés par un tube de gros diamètre.

VORGESCHLAGENE SYSTEME

Modell	Beschreibung
G5PS	System mit einem 91 cm/38 Watt Entfeuchter und einem Befeuchter.
G6PS	System mit einem primären 91 cm/38 Watt Entfeuchter, einem 61 cm/25 Watt Entfeuchter und einem Befeuchter.
G7PS	System mit einem primären 91 cm/38 Watt Entfeuchter, einem 61 cm/25 Watt Entfeuchter und zwei Befeuchtern mit Schlauchverbindung.

Schematic Diagrams for System Installations

Schémas d'installation du Système dans les pianos à queue

Schematische Diagramme für den Einbau von Systemen in Flügeln

Piano Models Included

Baldwin: M, R, L, SF-10, SD-10

Petrof: P-159, P-173, P-194, P-210, P-237, P-284

Bechstein: 5' 7"

Samick: SIG-50, SG-150C

Sauter: 160, 185, 220, 275

Bösendorfer: 170, 290 Imperial

Boston: GP156, GP178, GP193

Steinway: S, M, L, O, A, B, D

Kawai: GM-1, GM-2, GE-1, GE-2, GE-3, RX 1, RX 2, RX 3, GS 40, RX 5, RX 6, RX 7

Yamaha: C1, GH1, GP1, C2, C3, C5, C6, C7, CF

Ga1, G2, G3B, G3, S4, S6

Mason & Hamlin: A, AA, B, BB, CC

To the Technician

These schematics are accurate to the best of our knowledge. If you have suggestions to improve their accuracy, please let us know.

Estimated Installation Time

Estimated installation times are shown beside the System model number. Actual installation time depends upon your skill, previous experience and your participation in Dampp-Chaser training.

The first-time installer might want to add 45 minutes to these times. It is very important to add time to train the piano owner on the care and maintenance of the System.

Grand Systems Guidelines

1. Model **G5PS** should be used for pianos less than 173 cm (5' 7" and below). Use model **G6PS** for 173-243 cm (5' 8" to 7.9'). Use model **G7PS** for large grands, 244 cm and up (8' and up). The G7PS has two Humidifiers (Figure 1). In extremely dry regions or in areas with severe winter dryness, we recommend model G7PS for pianos 220 cm and up (7.2' and up). For more details about the Systems, please read the "Suggested Systems" information.

In extremely humid conditions: Occasionally, you may realize you can't stabilize the piano's tuning using the Dehumidifiers included with the System. In that situation, order an extra Dehumidifier from your distributor and mount it in a location similar to Figures 2 & 3. Plug the Dehumidifier into a power strip and plug the power strip into the Humidistat's Dehumidifier outlet.

2. If a piano is not featured here and you have a sketch of the beam configuration, compare it to diagrams of other pianos to find similar beam placement and System suggestions.

3. Read the instructions included with the System for specific distances between parts.

4. **Extreme air movement** can occur where drafts from air vents, open windows, foyers and hallways actually blow the good air created by the Piano Life Saver System out of the piano. To combat air movement you can install a Grand Undercover®. Covers are patent-protected and are available from your Piano Life Saver distributor. The covers are made of special stereo-speaker cloth that does not muffle the piano's sound.

Pour le Technicien

Nous avons dessiné ces schémas le plus précisément possible, en y apportant tout notre savoir-faire.

Si vous avez des suggestions pour améliorer leur précision, merci de nous les indiquer.

Temps d'installation Estimés

Les Temps d'installation Estimés sont indiqués à côté des références des Systèmes. Le temps d'installation réel dépend de votre compétence, de votre expérience et de votre participation aux stages de formation Dampp-Chaser.

Lors de la première installation, le technicien devrait ajouter 45 minutes à ces temps. Il est très important de compter un temps supplémentaire pour monter au propriétaire du piano comment assurer l'entretien du Système.

Systèmes pour pianos à queue - Instructions
