

Notes for the Hakobe

I. Although the Hakobe is a safe and convenient device for moving pianos, pianos are heavy enough to cause accidents and personal injury if the Hakobe is used incorrectly. Please ensure that it is used with a full understanding of its operating system and please follow the correct procedures.

II. Please make sure that the floor is flat and even and that the floor is strong enough to support a weight of over 800kg.

III. Please do not leave the piano unattended while it is being lifted with the Hakobe.
(This will leave the piano at risk of being damaged.)

IV. Please ensure that inspections maintenance on the Hakobe is carried out once a year.

V. The Hakobe is for indoor use only.
It should be stored indoors where there is low humidity.

VI. Please be careful to avoid getting your feet caught under the casters of the Hakobe.

VII. Please do not work in slippers, etc. as this could be is very dangerous.
※ It is recommended to use safe, strong shoes.
